Experience

Sept 2020 –

Character AI Lead, NTT Disruption, Boston, MA

Engineering Lead in charge of architecting, developing and evaluating cutting-edge conversational technologies and character experiences for Jibo.

- Led design, development and collaboration with Microsoft on *Project Pupil*—a multi-lingual, multi-turn, memory-assisted dialog experience built atop Neo4j and BotFramework
- Integrated and deployed new advanced multi-lingual TTS engine into conversational pipeline; replaced aging, unsupported mono-lingual on-board engine
- Led performance optimization initiative—built out analysis pipeline with semi-automated reporting and implemented solutions to reduce interaction latencies across the stack
- Contributed to ideation, design and definition of collaborations with, and Jibo deployments to, B2B customers (e.g. Children's Hospitals)

Keywords: TypeScript / JS / Node, Azure Speech/ Cognitive Services, Neo4j, BotFramework, NLU, HRI

2018 – 2020

Human-Robot Interaction Engineer, Piaggio Fast Forward, Boston, MA

Software Integration Lead and Smart Behaviors liaison; bridged the gap between the investigation and design of high-level behaviors in gita and their implementation.

- Managed, tracked and tested feature development in the pre- and post-launch phases of gita.
- Co-designed, implemented and integrated brokerless, type-safe messaging framework atop ZeroMQ and Cereal as replacement for ROS core / messages.
- Co-developed numerous core app architectures across gita—incorporating modern C++ features and techniques when prudent.
- Core contributor to the investigation, design and specification of numerous novel human-robot dyad behaviors for gita.

Keywords: C++ (17), ROS, ZeroMQ, Autonomous Robot, HRI, Linux

2016 – 2018

Character AI Engineer, Jibo, Boston, MA

Member of the team tasked with making the first social robot for the home—Jibo—feel lifelike, produce dynamic behavior, and ensure a consistent character experience across his wide range of interactions and skills.

- Co-architect and lead developer of *Embodied Speech*, a subsystem that blends Jibo's speech with animation, graphics and sound to create character-rich dialog interactions.
- Lead developer of *Chitchat*, Jibo's ontological dialog ability, and co-led GQA, Jibo's general question-answering service—the most frequent user-initiated interactions with the robot.
- Co-designed and implemented a novel, distributed robot/cloud skill architecture resulting in a significant interaction latency reduction and a far more scalable content-delivery pipeline.
- Led development of an animation database, a core module that enables queries for, and configuration of, animation and sound assets for on-demand playback and control on Jibo.

Keywords: TypeScript / JS / Node, Python, Docker, NLP/NLU, HRI, OSX

2014 - 2016 **Robot Software Engineer, Softbank Robotics (Aldebaran), Boston, MA**

Member of a small agile team working across the Aldebaran stack—from NaoQi middleware modules to core applications.

- Designed and built Act framework for semi-autonomous multi-robot-human interactions.
- Co-developed *ALTactileGesture*, a high-level touch sequence gesture recognition module.
- Released *Mad Chats*, an interactive Mad Libs-esque word game played between human and robot.
- Part of the team that designed and built a core application launching and dialog interaction for all Aldebaran robots.
- Designed, built and regularly demoed semi-autonomous robot greeter for range of external clients.

Keywords: Python, JS, C++, HTML/CSS, HRI, Linux

Research Experience

2012 - 2014 **Graduate Research / Teaching Assistant, Human Robot Interaction Lab, Tufts University, Medford, MA**

Areas of focus: human-robot teaming, situated natural language understanding and generation.

- Overhauled system GUIs for ADE middleware, yielding improved stability, efficiency and a simplified UI.
- Developed data-mining tools for rich audio and video corpora and annotations.
- Designed and built web-survey platform for multiple HRI studies.
- Designed, conducted and analyzed multiple HRI studies investigating multiple factors within human-robot teams.

Keywords: Java, Clojure, C++, JS, HTML/CSS, PHP, HRI, NLP, Linux, \LaTeX , R

2010 - 2012 **Graduate Research / Teaching Assistant, Computer-Human Interaction Lab, BGSU, Bowling Green, OH**

Areas of focus: Tangible interfaces and accessibility

- Designed, built and tested an alternative UI for World of Warcraft for the visually impaired community.
- Investigated the learning benefits of—and trade-offs between—mouse, touch and tangible input systems via a novel deduction puzzle/ game.
- Part of a team that developed a novel tangible password input system.
- Helped build a series of web-tools for use in undergraduate Geology courses.

Keywords: Java, C++, HCI, Windows

2008 - 2010 **Research Assistant, Rhythm, Attention and Perception Lab, Bowling Green State University, Bowling Green, OH**

- Independently designed and built neural-network that modeled human auditory tone categorization.

Keywords: MATLAB

Technical Skills

Languages

Core: Typescript / JS, C++ Rusty: Python, Java, HTML/CSS Familiar: Clojure, PHP, R

Software / Tooling

Database: Neo4j, MongoDB, MySQL Cloud: Docker, Elastic/Kibana Source: Git, SVN

Platforms / Robots

- Microsoft **BotFramework**—Enterprise-grade framework for building conversational AI experiences.
- **Jibo**—One of the first social robots for the home.
- Piaggio Fast Forwards' **gita**—Hands-free cargo carrying, following robot.
- **ROS**—Most widely adopted open-source robotics middleware.
- Softbank / Aldebaran's **Pepper and Nao**—Humanoid robots used in various business/educational settings.
- **ADE**—A research-focused, distributed, multi-agent robotics middleware.

Education

- 2012 - 2014 **Doctoral studies in Computer Science & Cognitive Science, Tufts University, Medford, MA**
Withdrew in good standing from joint-Ph.D. program
- 2011 - 2012 **M.S. in Computer Science, Bowling Green State University, Bowling Green, OH**
Concentration: Human-Computer Interaction
- 2007 - 2011 **B.S. in Computer Science & Psychology, Bowling Green State University, Bowling Green, OH**
Minor in Mathematics, Cum Laude

Patents

- 2018 *Embodied Dialog and Embodied Speech Authoring Tools For Use With An Expressive Social Robot*
US20180133900A1. Jibo/NTT Ditrust. Patent Pending
- 2018 *Maintaining Attention and Conveying Believability via Expression and Goal-Directed Behavior with a Social Robot*
US20180229372A1. Jibo/NTT Ditrust. Patent Pending

Publications

- 2015 *Investigating the Effects of Robot Affect and Embodiment on Attention and Natural Language of Human Teammates.* (CogInfoComm '15)
- 2014 *Investigating Human Perceptions of Robot Capabilities in Remote Human-Robot Team Tasks based on First-Person Robot Video Feeds.* (IROS '14)
- 2013 *On Interface Closeness and Problem Solving.* (TEI '13)
- 2012 *Leveraging Motor Learning for a Tangible Password System.* (CHI '12)
- 2011 *Access-a-WoW: Building an Enhanced World of Warcraft UI for Persons with Low Visual Acuity.* (UAHCI '11)

Achievements

- 2020 gita awarded Red Dot's 'Best of the Best' in 'Innovative Products' meta-category
- 2017 Jibo named Time Magazine's #1 of the "25 Best Inventions of 2017"
